1.3 By 4.00 pm on Tuesday 20 October for the 2026 edition, following approval by the Administration, the organising racing company shall publish the ranking drawn up by adding together the scores for the following parameters:

- the highest total winnings in a horse's career,
- the highest total winnings in the preceding twelve months
- the highest prize money won in the past six months

for the purpose of determining the first twelve horses admitted to the race; further down the ranking, in the event of a tie or a score of zero, a draw shall be held, with reserves listed in order of entry in the event of any of the twelve designated horses withdrawing.

1.4 The entry declaration is scheduled for 10.30 am on Thursday 22 October for the 2026 edition. The fee for the entry declaration, payable to the organising racing company, is €700.00, it being understood that no confirmation fee is required for this race.

. A horse declared as a starter may not take part in any other races until the Grand Prix has been run.

1.5 The draw for starting numbers takes place after the starters have been declared, in public and/or on live television.

1. 6 Following the declaration of starters and the draw for numbers, should one or more horses withdraw, the reserves shall take their place (in accordance with the ranking) until the field of 12 is complete or until all available horses have been used, with the horse with the highest number in the row affected by the withdrawal being selected, up until 9.30 am on Monday 26 October for the 2026 edition. Reserves, after paying the

entry fees, must settle the other fees once they are included amongst those admitted to the race.

1.7 Horses excluded from the 12 even after the reserves have taken their places – except in cases where a reserve refuses to take a place – are entitled to a refund of the amount paid as an entrant.
